

Our Plans are from Australia, United Kingdom, Italy and Poland. We recommend that a modeller build two or three kit models before starting "Scratch" building. Building a model from plans can be more expensive and more time consuming than buying a kit however scratch building can be a most rewarding and economical exercise. Most plans (except Euro Model & Underhill) do not suit bread-and-butter type construction. Please note that we do not stock all timber sizes and fittings shown in the various plans we stock. We however will endeavour to secure particular items on request. It is important to remember that the plans are a guide only and because of scale there may be some compromises in the detail provided.
